Investment Option Description

JPMorgan U.S. Small Company Fund Class A

Fund Code: 85138

Ticker: JTUAX

Gross Expense Ratio: 1.41% as of 06/01/2015

Objective: The investment seeks to provide high total return from a portfolio of small company stocks.

Strategy: Under normal circumstances, the fund invests at least 80% of its assets in equity securities of small cap U.S. companies. "Assets" means net assets, plus the amount of borrowings for investment purposes. Small cap companies are companies with market capitalizations similar to those within the universe of the Russell 2000® Index at the time of purchase.

Risk: The securities of smaller, less well-known companies can be more volatile than those of larger companies. Value and growth stocks can perform differently from other types of stocks. Growth stocks can be more volatile. Value stocks can continue to be undervalued by the market for long periods of time. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.

Short Term Trading Fee: None

Who may want to invest:

- Someone who is seeking the potential for long-term share-price appreciation and, secondarily, dividend income.
- Someone who is seeking both growth- and value-style investments and who is willing to accept the generally greater volatility of investments in smaller companies.
